## Your Docusaurus site did not load properly.

A very common reason is a wrong site **baseUrl configuration**.

Current configured baseUrl = / (default value)

We suggest trying baseUrl = blank/

# Puppeteer

Puppeteer is a Node.js library which provides a high-level API to control Chrome/Chromium over the <u>DevTools Protocol</u>. Puppeteer runs in <u>headless</u> mode by default, but can be configured to run in full ("headful") Chrome/Chromium.

### **Get started | API | FAQ | Contributing | Troubleshooting**

#### Example

```
import puppeteer from 'puppeteer';
(async () => {
 // Launch the browser and open a new blank page
 const browser = await puppeteer.launch();
 const page = await browser.newPage();
 // Navigate the page to a URL
 await page.goto('https://developer.chrome.com/');
 // Set screen size
 await page.setViewport({width: 1080, height: 1024});
 // Type into search box
 await page.type('.devsite-search-field', 'automate beyond recorder');
 // Wait and click on first result
  const searchResultSelector = '.devsite-result-item-link';
 await page.waitForSelector(searchResultSelector);
 await page.click(searchResultSelector);
 // Locate the full title with a unique string
  const textSelector = await page.waitForSelector(
    'text/Customize and automate'
 const fullTitle = await textSelector?.evaluate(el => el.textContent);
 // Print the full title
 console.log('The title of this blog post is "%s".', fullTitle);
 await browser.close();
})();
